Discussion Points

Cities in the emerging nations

- Rapid urbanization
- Infrastructure shortage
- Environmental deterioration
- Increasing natural disasters
- Lack of government funds
- Lack of skills and technologies
- Social issues – safety and security

Cities in the developed nations

- Aging population
- Aging infrastructure
- Low birth rate-*slow economic growth*
- Energy and environmental issues
- Increasing natural disasters
- Global competition and mobility
- Social issues – safety and security
- Fiscal challenge

- 
- *How to develop liveable and sustainable “future” cities? How to upgrade/renew mature cities into “future” cities?– Creating economic, environmental, and social values*
 - *How to implement such “future” cities?*
=> Delivery models? Public-Private-Partnership?
